

## Open PhD Position in Inorganic Chemistry

The *Technische Universität Braunschweig* (Germany) invites applications for an open PhD position that shall be filled from 1<sup>st</sup> of January 2018 or later at the Institute of Inorganic and Analytical Chemistry, in the research group of Prof. Dr. Matthias Tamm. The PhD positions gets funded by the Deutsche Forschungsgemeinschaft (DFG) and is part of the joint German-Polish research project **“Anionic Carbenes and Boryl Anions: Coordination of the Properties of Ruthenium Complexes in Olefin Metathesis”** which runs in cooperation with the Centre of New Technologies of the *University of Warsaw* (Poland). For the application, it is advantageous but not necessary if the applicant would have first experience in the synthesis of inorganic and/or organometallic molecules.

The applicant should hold a master's or equivalent university degree in chemistry. Applications, comprising a letter of interest, professional CV, scanned certifications and a list of publications, together with a recommendation letter should be sent to:

**Prof. Dr. Matthias Tamm, Technische Universität Braunschweig,  
Institut f. Anorganische u. Analytische Chemie,  
Hagenring 30, 38106 Braunschweig.**

The TU Braunschweig is committed to a policy of equal opportunity and strives to increase the proportion of women in science. Applications from female candidates are therefore particularly encouraged. Severely disabled applicants with equal qualification and aptitude will be given preferential consideration. Evidence of disability is required. Application expenses will not be refunded.
