

How to manage all that research literature: An introduction to Citavi

This course offers a general introduction to the reference management software Citavi and its main features. Participants will learn how to make use of Citavi with regards to documenting sources and writing papers as well as general project management tasks. With Citavi users can manage and maintain all their research literature, organize content, such as citations or other data and easily generate lists of references. Scientific research and the writing of papers can therefore be supported and made easier by using Citavi.

Method

Step-by-step, participants will be shown how Citavi works and how its main function are applied. Prior knowledge of the software is not necessary. Besides the general introduction, participants will be given tasks in order to discover the program in a hands-on manner.

Citavi is licensed by the TU Braunschweig and students can register to use Citavi for free.

Please note:

This workshop cannot be credited as qualification measures at the Department of Mechanical Engineering. However, you are welcome to participate.
