**Agile: Transforming teams & projects**

This workshop will give you a practical and interactive insight into how Agile is being used to transform teams working on complex projects today.

As today’s marketplace demands the creation of faster, leaner and more innovative products & services, working with Agile frameworks has become the norm across many industries.

At the end of the workshop, participants will gain:

• understanding of what it means to be and work ‘Agile’
• the fundamentals of popular Agile frameworks - Scrum & Kanban
• scaling techniques for large-scale projects & organisations
• knowledge of project risks and constraints
• insight into the changing attitudes and approaches towards project management

**Content**

- Defining & understanding the Agile values & principles
- Identifying the differences between Waterfall vs. Agile frameworks
- Exploring how Scrum has become the preferred framework for teams
- Exploring how Kanban helps improve project flow
- Building essential skills & tools when scaling Scrum for multiple teams

**Methods**

- Problem-solving activities, Games, Simulations, Real-life case studies, Discussions, Presentations

**WHEN**

17.09.2020 09:00 - 17:00
18.09.2020 09:00 - 17:00
