

Prepare for the Certified Junior Project Manager (IAPM)

This workshop prepares you for the Junior Project Management-Certification of the International Association of Project Managers (IAPM). Therefore you learn project management methods and soft skills on an advanced level.

Content

- PM-Methods using the waterfall methodology: Project goals, phase model, stakeholder and environmental analysis, risk analysis, time and cost planning,... (19 topics)
- Soft Skills: Teammanagement, leadership, motivation,... (8 topics)

IAPM Certification

Internationally recognized, online "Certified Junior Project Manager (IAPM)" certification is the first certification for project management novices, students or people who are interested in a future career in project management. It qualifies you to work in projects and is a persuasive argument in a job application.

The certification examination covers basic project management subjects. Candidates who pass the examination receive a certificate confirming their basic theoretical knowledge of project management.

The certification/examination fee depends on your nationality. This ensures that project managers of all nations can afford their certifications. The certification fee also entitles you to take a preparatory test so that you can check your project management knowledge level and get valuable feedback on any gaps.

Requirements for this workshop

Advanced knowledge in Project Management is required for attending this workshop. For example you have attended the PM I and PM II or other basic and advanced workshops offered in the Grad^{TUBS} programme.

Notice

This workshop prepares for the examination. Participants register themselves at IAPM to pass the exam whenever they want. Grad^{TUBS} won't pay for the exam.
