

Research data publication checklist

- Conscientious data selection (What data is really relevant for archiving / publication?)
- Consistent file naming without special characters
- Hierarchically structured folders with meaningful naming
- Open, non-proprietary file formats
- README file with descriptive metadata
- Finding a suitable repository (e.g. using [redata.org](https://www.redata.org))
- Legal and ethical aspects are considered
- Choosing a suitable license (e.g. Creative Commons)
