

Declaration of consent for the examination of my work with a plagiarism detection software*

At Technische Universität Braunschweig dissertations can be checked for plagiarism.
With my signature, I agree that the scientific work to be done by me as part of the provision of study and examination services can be subjected to an automatic plagiarism check after the submission.

Surname, name, matriculation number

agree that the scientific work to be done by me as part of the provision of study and examination services can be subjected to an automatic plagiarism check after the submission.

The verification of the work is done exclusively in anonymous form, i.e. my personal data (first name, last name, student e-mail) will not be used.

My work will not be stored permanently for plagiarism checking unless a separate explicit consent is given (see below). If such consent for permanent storage is not expressly given, the test report and other files will be deleted once the respective test procedure has been completed.

Other storage obligations on the part of the university remain unaffected.

I am aware that the use of external, unmarked sources constitutes an attempt to deceive.

Voluntary extension:

I agree that my work can be used within ten years of the end of my studies as a benchmark for plagiarism checks on other works.

Refusal to sign does not have any disadvantages in the course of my studies.
