

Kolloquium der Institute für Anorganische und Organische Chemie

Wintersemester 2025/2026

Montag, 20.10.2025, 17.15 Uhr, HR 30.1

Prof. Dr. Ulrich Siemeling (Universität Kassel)

NHCs and CAACs with a 1,1'-Ferrocenylene Backbone and Their Heavier Analogues

Montag, 27.10.2025, 17.15 Uhr, HR 30.1

Prof. Dr. Martin Breugst (Technische Universität Chemnitz)

Mechanisms, Applications, and Limitations in Iodine Catalysis

Montag, 03.11.2025, 17.15 Uhr, HR 30.1

Prof. Dr. Doron Pappo (Ben Gurion University)

More is Better: Enhanced Reactivity and Unique Selectivity of Hydroxo Multicopper Clusters in Oxidative Phenol Coupling

Montag, 10.11.2025, 17.15 Uhr, HR 30.1

Prof. Dr. Udo Radius (Julius-Maximilians-Universität Würzburg)

N-Heterocyclic Carbenes for the Stabilization of Early Transition Metals and Main Group Metals in High Oxidation States

Montag, 17.11.2025, 17.15 Uhr, HR 30.1

Jun.-Prof. Dr. Johannes Walker (Georg-August Universität Göttingen)

(Photo)-Activation of σ - and π -bonds in [2+2] Cycloadditions to Bicyclo[2.1.1]hexanes

Montag, 26.01.2026, 17.15 Uhr, HR 30.1

Prof. Dr. Lena Daumann (Heinrich-Heine-Universität Düsseldorf)

Selective Binding of Lanthanides and Actinides Using Lanthanide-dependent Bacteria and their Biomolecules
