

Kolloquium der Institute für Anorganische und Organische Chemie

Sommersemester 2026

Montag, 11.04.2026, 17:15 Uhr, HR 30.1

Prof. Dr. Konstantin Bukhryakov (Florida International University)

Vanadium for Olefin Metathesis

Montag, 11.05.2026, 17:15 Uhr, HR 30.1

Prof. Dr. Axel Jacobi von Wangelin (Universität Hamburg)

Explorations into the dark and bright sides of catalytic small molecule activations

Montag, 18.05.2026, 17:15 Uhr, HR 30.1

Prof. Dr. John Molloy (FU Berlin)

Illuminating Routes to Organoboron Molecules Leveraging Boron Hybridisation Effects

Donnerstag, 11.06.2026, 15:00 Uhr, Aula der TU

Prof. Dr. Craig M. Crews (Yale University): Inhoffen-Vorlesung

Induced Proximity Drug Modalities: Hijacking Mother Nature to Control Protein Function

Montag, 15.06.2026, 17:15 Uhr, HR 30.1

Prof. Dr. Holger Bettinger (Universität Tübingen)

Photoisomerization of BN-Benzenes for Energy Storage

Mittwoch, 24.06.2026, 16:15 Uhr, HR 30.1

Tag der Chemie am Hagenring

Montag, 08.07.2026, 17:15 Uhr, HR 30.1

Prof. Dr. Georgii I. Nikonov (Brock University)

Bond breaking and making by low-valent main group compounds

Montag, 20.07.2026, 17:15 Uhr, HR 30.1

Prof. Dr. Hideki Yorimitsu (Kyoto University)

Aromatic Metamorphosis: Skeletal Transformations of Aromatic Rings

Prof. Dr. Marc Walter, Prof. Dr. Christopher Teskey
