### **Zusätzliche Kommentare/Anregungen:**

- I wish the room not change. I mean only one room for Thursday and Friday (same room)
- More elaborated sessions on HOME WORK discussions would make the content of the lectures as very very useful to the students. Sir, you can add some more content
- I would like to add that in the script a little addition could be made for the topics, that where could me make further readings or from which book or internet web site a student could receive some further information or even some basic knowledge if the topic is a new one
