

LIST OF CONTENTS

	PAGE
1. INTRODUCTION	3
1.1 Problem outline	3
1.2 Outline of the test programme	3
2. TEST PROGRAMME	3
2.1 Test specimens	3
2.2 Material properties	6
2.3 Production of the test specimens	14
2.4 Test set-up	15
2.5 Measuring equipment	15
3. TEST PROCEDURE	20
3.1 Test process	20
3.2 Deflection measurements	20
3.3 Strain measurements	22
3.4 Cracking and failure behaviour	24
4. ANALYSIS AND INTERPRETATION OF THE TEST RESULTS	28
4.1 General	28
4.2 Load bearing and deformation behaviour	28
5. EVALUATION OF THE TEST RESULTS	33
5.1 Comparison of the test results	33
5.2 Comparison of the test results with theoretical approaches	34
5.3 Comparison of the test results with the DBV approach (Recommendations of the German Concrete Association)	36
5.4 FE (finite element method) investigation	41
6. SUMMARY	48
7. LITERATURE	50
8. APPENDICES	51
