Student Assistant Needed

for Robotic Fiber Winding and Spray Concrete Experiments

Position: HiWi (Student Assistant)

Hours: 20-40 Hours per Month

Start Date: January 2025

We are seeking a dedicated student assistant to support practical experiments in the fields of Robotic Fiber Winding and Spray Concrete. The responsibilities include assisting during the experiment processes and ensuring smooth operation.

Key Responsibilities:

- Assist in the setup and execution of robotic fiber winding experiments
 - Support spray concrete applications
- Collaborate with team members to ensure accurate data collection
 - Maintain and organize experiment materials and equipment

Requirements:

- Enrolled student in a relevant field (e.g., architecture, civil engineering, robotics, engineering, materials science)
 - Detail-oriented with strong organizational skills
 - Ability to work independently and as part of a team

Benefits:

- Hands-on experience in cutting-edge robotic and material technology
 - Flexible working hours (20-40 hours per month)
 - Opportunity to work on innovative research projects
