Prof. Edith Kaan

(Department of Linguistics, University of Florida)

21. Mai 2025 | 11:30 Uhr – 13:00 Uhr

“Investigating cognitive control in code-switching using conflict adaptation paradigms”

“Code-switching, that is, the alternation between different languages in a single conversation or utterance, provides a unique window into how the mind controls two or more languages. In this talk, I will discuss some hypothesized connections between code-switching and general cognitive functions such as attention and inhibition. “
