

Our targets for 2021:

25 % female professors
20 % C4/W3 female professors

TU Braunschweigs' programmes to promote equal opportunity are specific offers for each qualification level: from female pupils to female professors. Furthermore, there are family-friendly framework conditions for all members of the university and offers for diverse students.

In addition to the existing programmes, the university plans:

- to move girls to STEM
- to move international careers of female scientists
- to move more female professors to TU Braunschweig

The Equal Opportunity Office supports the president and university boards, faculties and instituts and all university members to establish equal opportunity.
