

Relative amount of myoglobin in solution. The listed relative concentrations were obtained individually from the same protein batch.

Material	Conc. after contact (stock solution = 100 %)
AAS Sample Vial	100 % *
PVDF Filter	99.5 %
Eppendorf cup	93.5%
Precolumn filter unit	88,2%
Precolumn filter unit (new)	82,9%
SEC Column	66.3 %

*100% concentration approximately equal 1 mg/ml myoglobin in mMESBS
